

one ~s for) **2** : to use artful bait or wily means : **SCHEME** (<~ for an invitation to the party) ~ **vt** : **FISH** (<~ a stream)  
**angle** \ " \ n -s [M<sup>1</sup> or MF, fr. L *angulus*; akin to OHG *anclōw* ankle, OHG *anchlāo*, *anchal*, *enchil*, ON *ökkla*, Gk *angos* pail, Skt *aṅga* limb, OE *angel*, *ongul* fishhook — more at **ANGLE** (fish-hook)] **1 a** *archaic* : a corner or area near a corner **b** *archaic* : an out-of-the-way place (<into the utmost ~ of the world — Edmund Spenser) : **NOOK** **2 a** : the figure formed by two lines diverging from the same point or by two surfaces diverging from the same line **b** : a representation of such a figure or space **3** : one of the four astrological houses at the cardinal points of the compass **4** : a projecting corner (as of a stone or building) : a pointed form or sharp fragment **5 math** : a measure of the amount of rotation of either of two intersecting lines necessary to produce coincidence with the other, the rotation being in the plane of the lines and about the point of intersection; *also* : a measure based on this for indicating the divergence of two nonintersecting nonparallel lines, two intersecting planes, or two intersecting curves **6 a** (1) : the direction from which an object is viewed : **POINT OF VIEW** (a camera ~) : **ASPECT**, **PHASE** (<to discuss all ~s of a question> (2) : the point of view or special interest or emphasis controlling a presentation (as of a story, article, or speech) or the phase of a presentation that is of interest to or bears upon a certain group or point of view **b** *slang* : **SCHEME** : a slick knowledge of method esp. in criminal activities : a method for illegal gain **7** : a curving direction given a ball (as by a stroke or kick) (<put ~ on a tennis return> **8** : **ANGLE IRON** *syn* see **PHASE**

angles: *ABD* and *ABC* right angles; *FBD*, *F'BD*, *F''BD* acute angles; *EBD*, *E'BD*, *E''BD* obtuse angles; *CBD* straight angle; *GBD* reflex angle; *B* vertex

**angle** \ " \ vb angled; angled; angling \ -g(ə)liŋ \ angles **vt**  
**1 a** : to turn, bend, move, or direct at an angle (<I angled a look behind me — *Think*> **b** : to hit at an angle : strike or kick (a ball) toward the sidelines (<~ a tennis return> **2** : to adjust at an angle (<~ a camera> **3 a** : to present the material of (as a news story, article, or speech) from a particular point of view or favorable to the interests of a particular group **b** : to warp (such a presentation) by emphasis or implication to favor a particular person, class, group, or race ~ **vi** **1** : to change direction by making an angular turn or turns (<the road ~s up the hill> **2** : to go at an angle (<~ across the road>)

**angle bar** *n* **1** : **ANGLE IRON** **2** : one of two bars used to splice the joint of two railroad rails

**angle bead** *n* : a corner bead set vertically at the meeting of two walls

**angle beam** *n* : a beam in which one part (as a flange) is at an angle with another

**an.gle.ber.ry** \ 'æŋgəl,berē \ *n* [prob. fr. (assumed) earlier E *angberry* — more at **ANBURY**] : a papilloma or warty growth of the skin or mucous membranes of cattle and sometimes horses often occurring in great numbers and thought to be caused by a filterable virus

**angle brace** *n* **1** : a brace across two pieces that meet at an angle — called also *angle tie* **2** : a boring brace for use in cramped places (as in a corner)

**angle bracket** *n* **1** : a bracket in an angle or corner of a molded cornice **2** : **BRACKET** **4b**

**angle brick** *n* : a brick of oblique shape (as for use at a salient angle)

**angle capital** *n* : the capital of a corner column; *esp* : a capital modified from the ordinary form so as to face on both sides of

the longitudinal axes of the longitudinal axis of that is positive when the angle of position : **AN**  
**angle of recess** : the angle of wheels in gear from pair of teeth until the angle of reflection : the normal drawn at the face — called also *spec*  
**angle of refraction** : the normal drawn at the which refraction occurs  
**angle of repose** **1 phys** : between two bodies in body is just on the point is the coefficient of friction  
**angle of rest** : the angle of any loose solid material — compare **ANGLE**  
**angle of roll** : the angle rotated about its longitudinal a horizontal plane, between than the right — called  
**angle of site** : the vertical gun and the horizontal  
**angle of slide** : the angle from the horizontal at which will flow — compare **A**  
**angle of the mandible** by the junction of the mandible  
**angle of thread** : the angle measured in an axial plane  
**angle of torsion or an** a radial section of a bone normal position when  
**angle of view** : the angle opposite edges of the lens  
**angle of yaw** : the angle wind and the plane of when the airplane turns  
**angle of zero lift** : **ZEP**  
**angle plate** *n* : a plate *specif* : one of two such in a shaper or other  
**ANGLE IRON**  
**anglepod** \ 'æŋgəl,peɪ \ *n* [<sup>4</sup> (genus *Gonolobus*) the  
**angler** \ 'æŋglə(r) \ *n* <sup>1</sup> *ai* angles **2 a** : a European marine fish (*Lophius* order *Pediculati* that range from three to five feet, depressed head and lies partly buried on the other fishes within its ments of a lure on its appendages around it of several closely related *Lophiidae*)  
**angle rafter** *n* : a raft a roof : as **a** : **HIP RAFT** cipal rafter under the  
**anglerfish** \ 'æŋglə(r) \ *n* :  
**angle rib** *n* **1** : one of rectangle of a Gothic structure **2** : a group
